(June 2023–Now)

#GOTTHEEXPERTSINSOFTWARE CORP.

Software Developer

- Collaborated with the development team to implement responsive user interface using Angular 15.
- Developed and maintained web applications, ensuring high performance and responsiveness.
- Implemented RESTful APIs to integrate front-end components with back-end services.
- Collaborated and utilized with other developers using Git for version control.

Projects

Lokalgift (Distributor & Branch Portal)

- Angular v.14, HTML, CSS Bootstrap, MySQL
- API Integration (ASP .NET Core 3.1), Sourcetree, Gitlab

TxTMGR

- Angular v.14, HTML, CSS Bootstrap, MySQL
- API Integration (ASP .NET Core 3.1), Sourcetree, Gitlab

CENECO II (Admin & CRM Portal)

- Angular v.14, HTML, CSS Bootstrap, MySQL
- API Integration (ASP .NET Core 3.1), Sourcetree, Gitlab

Profile

Web Developer that has the main areas of competence are front-end development and Angular; I've worked on a few projects that use Angular and am well-versed in its principles. I also have practical expertise creating applications that are dynamic, responsive, and easy to use.
